SUMMARY

Software Engineer and Solutions Architect with experience in designing scalable full-stack applications, distributed cloud infrastructures, and enterprise SaaS products. Skilled in bridging high-level software architecture (Clean Architecture, CQRS, DDD Lite) with modern frontend engineering (Next.js 15, TypeScript) and high-performance backends (.NET 8, Node.js).

PROFESSIONAL EXPERIENCE

- Güzel Mimarlık – Mühendislik | IT Specialist & Systems Support**
• Managed IT infrastructure, project design workflows, and technical deployment processes for engineering and architectural teams.
• Optimized workstation performances and integration pipelines for CAD and modeling applications.
- BSH Turkey | Team Solutions Architect**
• Architected and integrated Microsoft CRM and HTML5 solutions across enterprise workflows, enhancing cross-departmental data accessibility.
• Collaborated within Agile/Scrum teams to design C# and ASP.NET backend architectures, SQL Server database schemas, and SOAP/REST service integrations.
• Monitored application performance and system health using DataDog, Query Studio, and custom log parser tools to ensure high availability.
- Intertech | Full-Stack Software Engineering Intern**
• Completed an intensive 4-week Agile development sprint focused on building modern web applications using React and decentralized state workflows (Solidity).
- HITATEK | Backup & Recovery Intern**
• Executed enterprise data backup, recovery, and synchronization strategies utilizing Veeam, Rsync, and Node.js automation scripts.

Jun 2025 – Present | Manisa, Turkey (On-Site)

Sep 2022 – Sep 2024 | Istanbul, Turkey (Hybrid)

Aug 2022 – Sep 2022 | Istanbul, Turkey (Remote)

Sep 2021 – Oct 2021 | Ankara, Turkey (Remote)

EDUCATION

- Anadolu University | Associate Degree in Computer Programming**
• Final GPA: 3.33 / 4.00
- Istanbul Technical University (İTÜ) | Computer Engineering (Coursework completed up to Senior Year)**
• Focus: Engineering fundamentals, data structures, algorithms, and object-oriented systems design.

Sep 2024 – May 2026

2019 – 2023

KEY SKILLS

React, Next.js 15 (App Router, Server Actions), Tailwind CSS, Feature-Sliced Design (FSD), Zustand, React Query, Framer Motion, TypeScript, JavaScript, C#, Python, SQL, HTML5/CSS3, .NET 8 Web API, Node.js, Clean Architecture, CQRS, DDD Lite, RESTful APIs, Cloudflare R2, Redis (Upstash), Supabase

KEY PROJECT

ogretmenbusra.com Öğretmen Büşra (E-Learning Platform) | Full-Stack Developer

Architecture: Next.js 15, PostgreSQL, Prisma ORM, Auth.js, Cloudflare R2, Upstash Redis.
Impact: Engineered a high-traffic educational resource sharing platform for teachers and students, reducing server costs via serverless Edge distribution and zero-e-gress Cloudflare R2 object storage.
